Invites you to the latest in our free
Community Speaker Series

Climate Risk and Climate Action: **A Discussion with Prof. Peter de Menocal**

Dean of Science at Columbia University and Professor at Columbia's Department of Earth and Environmental Sciences

Join us to learn more about climate change. Prof. De Menocal will discuss his research and how climate change impacts life's essentials — our communities, access to food, water, shelter and energy.

Prof. De Menocal is the founding Director of the Center for Climate and Life at Columbia University, with a research team of over 120 Ph.D. scientists leading climate and life system research. A marine geologist and paleoclimate scientist at Columbia's Lamont-Doherty Earth Observatory, he studies ocean sediments to understand how and why past oceans and climates have changed, and the impact on human evolution and culture.

Wednesday, April 24, 2019

Greenwich Library, Cole Auditorium

101 W Putnam Ave Greenwich CT

Refreshments at 6:30pm

Presentation and Q&A from 7:00 - 8:30pm

Space is limited. RSVP Requested by April 21, 2019
